

Let's talk safety – beyond rule based requirements

by

Finn Primdahl Brodersen

Power-to-X Safety Network Meeting

Artelia, Søborg, 6th February 2024

Safety and effectiveness belong together

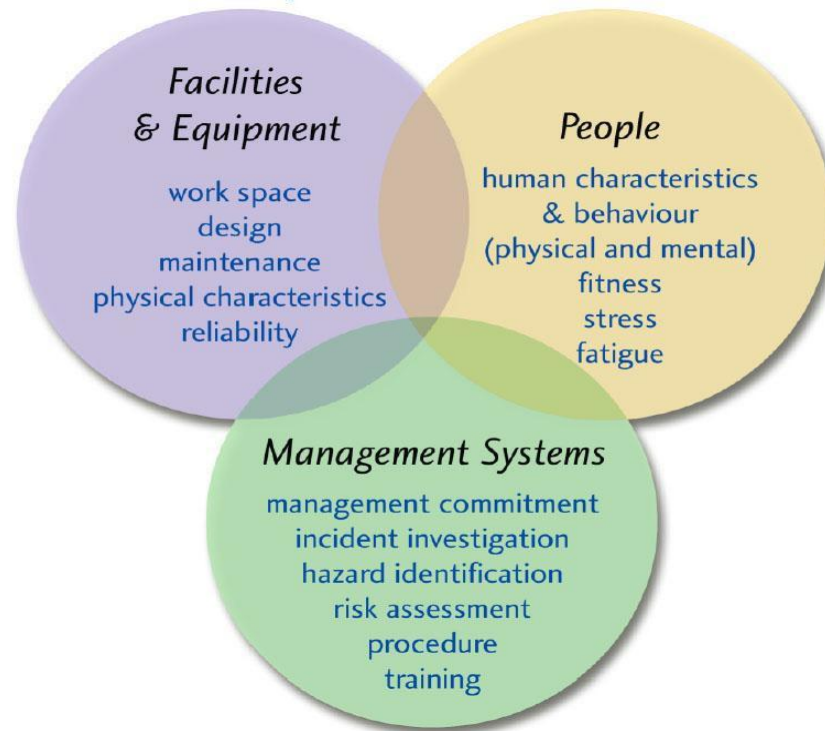

Stuart McGill, President of ExxonMobil Production Co., said companies with high HSE standards often do well financially.

”I think it’s safe to say **that companies that get HSE right get other things right too**”...

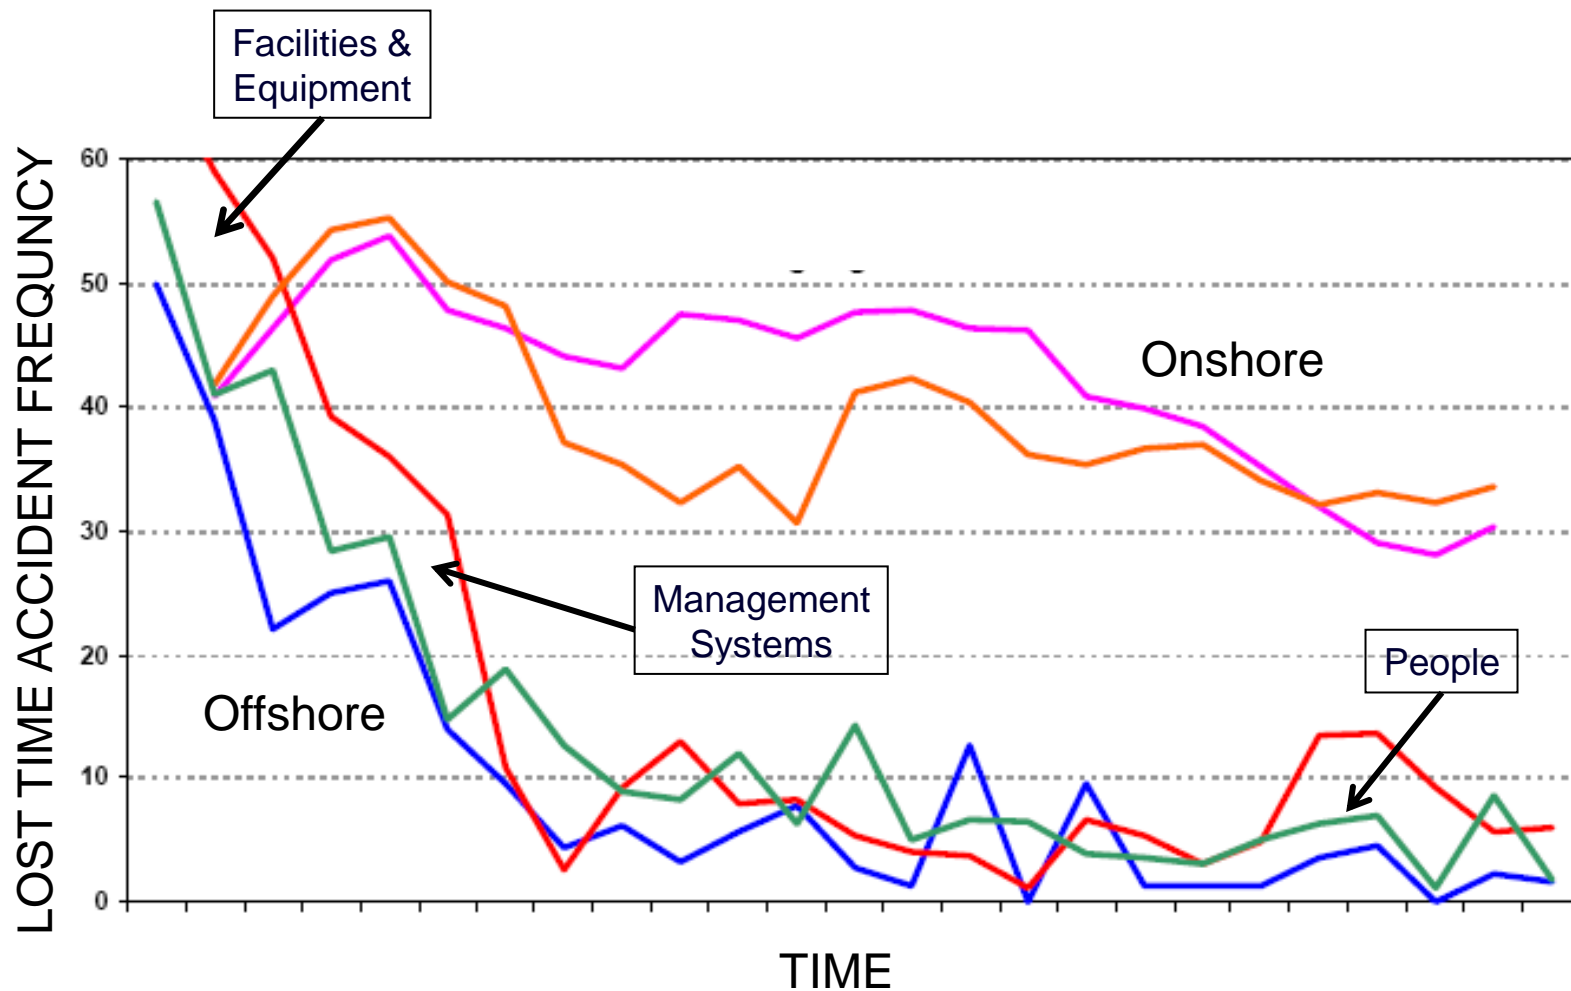

Excellent HSE standards **”deliver value to the bottom line** and say a lot about a company as a whole”

2004 SPE International Conference on HSE in Oil and Gas Exploration and Production.

Safety Management

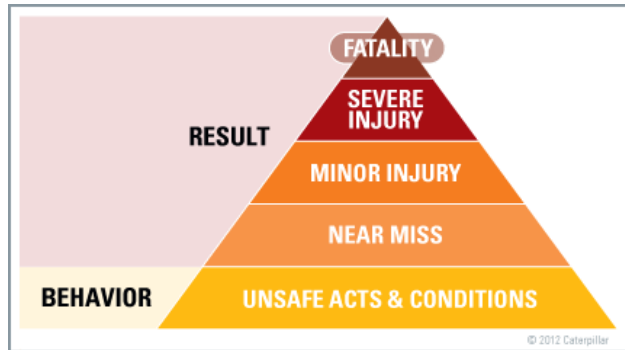

The Personal Lost Time Accident Statistics over time

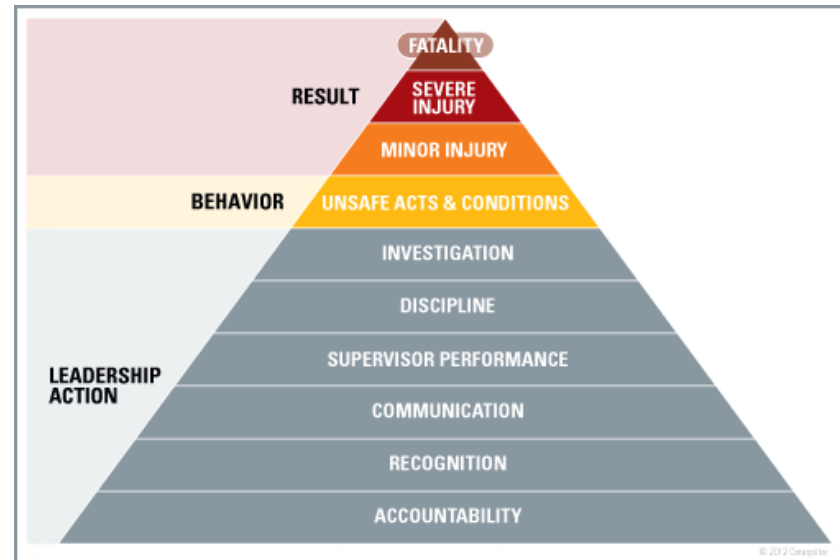

Historical data from Denmark

Understanding the nature of unwanted incidents

H. W. Heinrich, 1930's

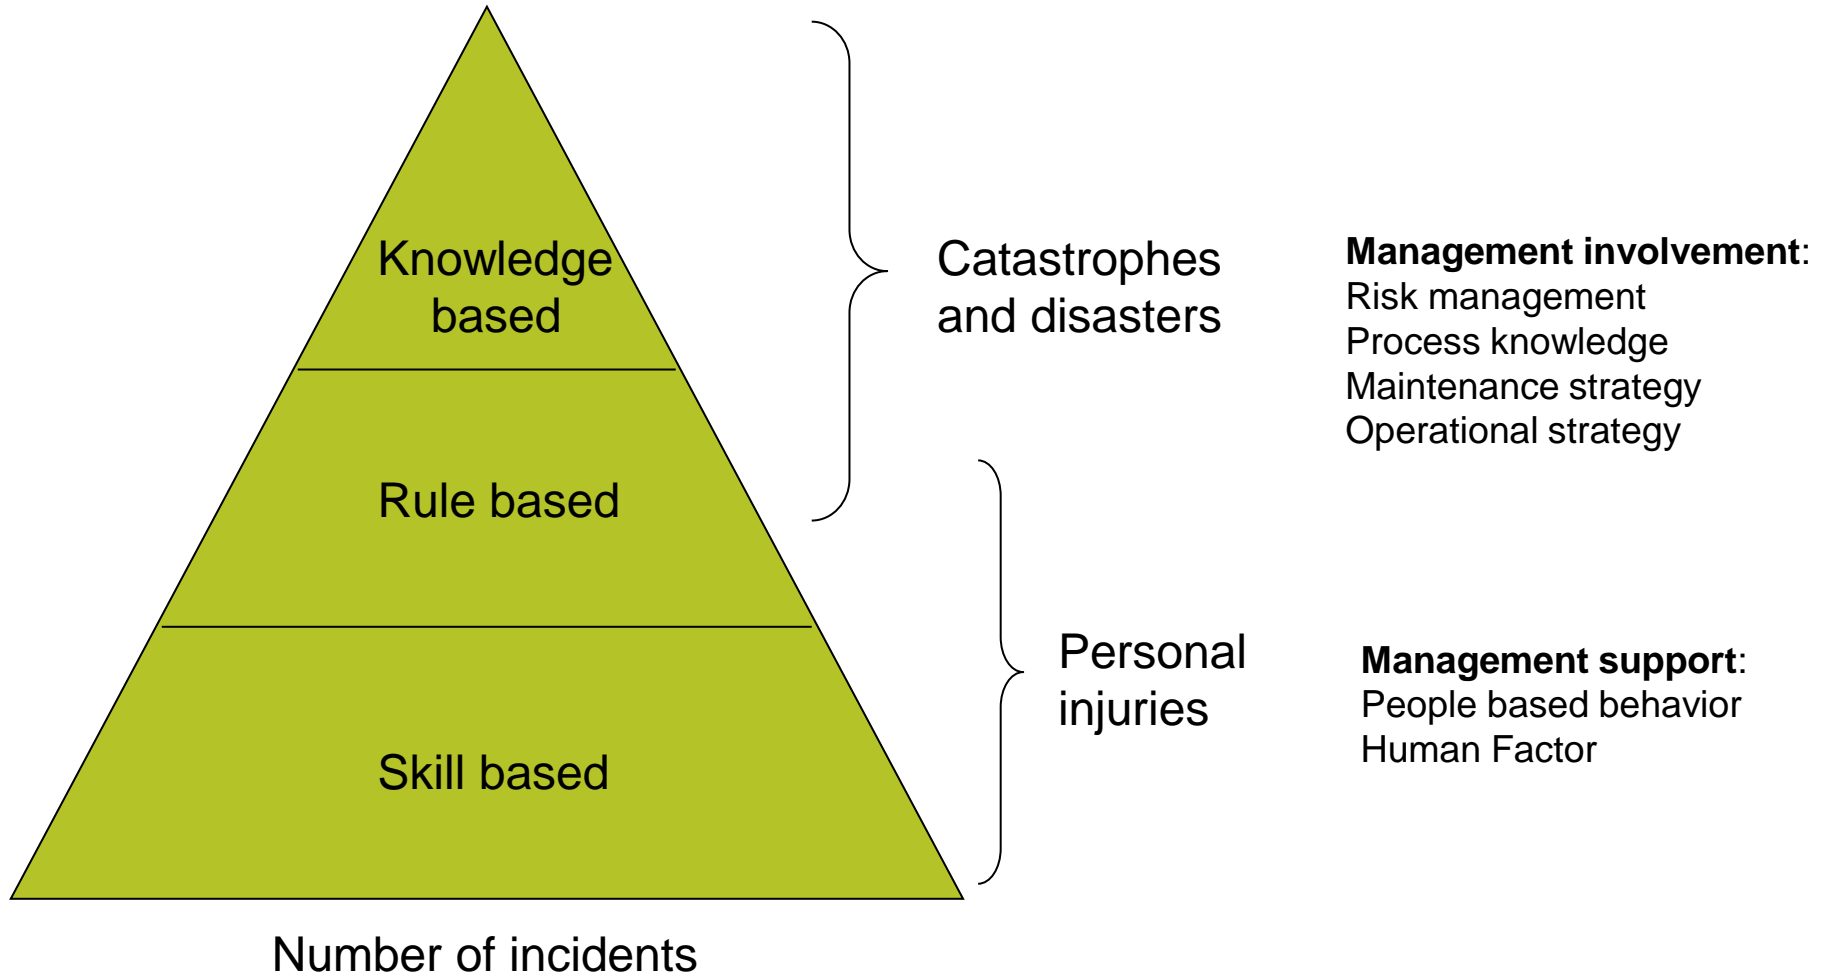

Multiplicity of Pyramids

IRF Offshore Safety Forum 30th March - 1st April 2005

The Incident Pyramid - Number of LTIs per Fatality - varies per Business Activity
 ref: US - Bureau of Labour Statistics - year 2001 data (exclusive Sept 11 events)

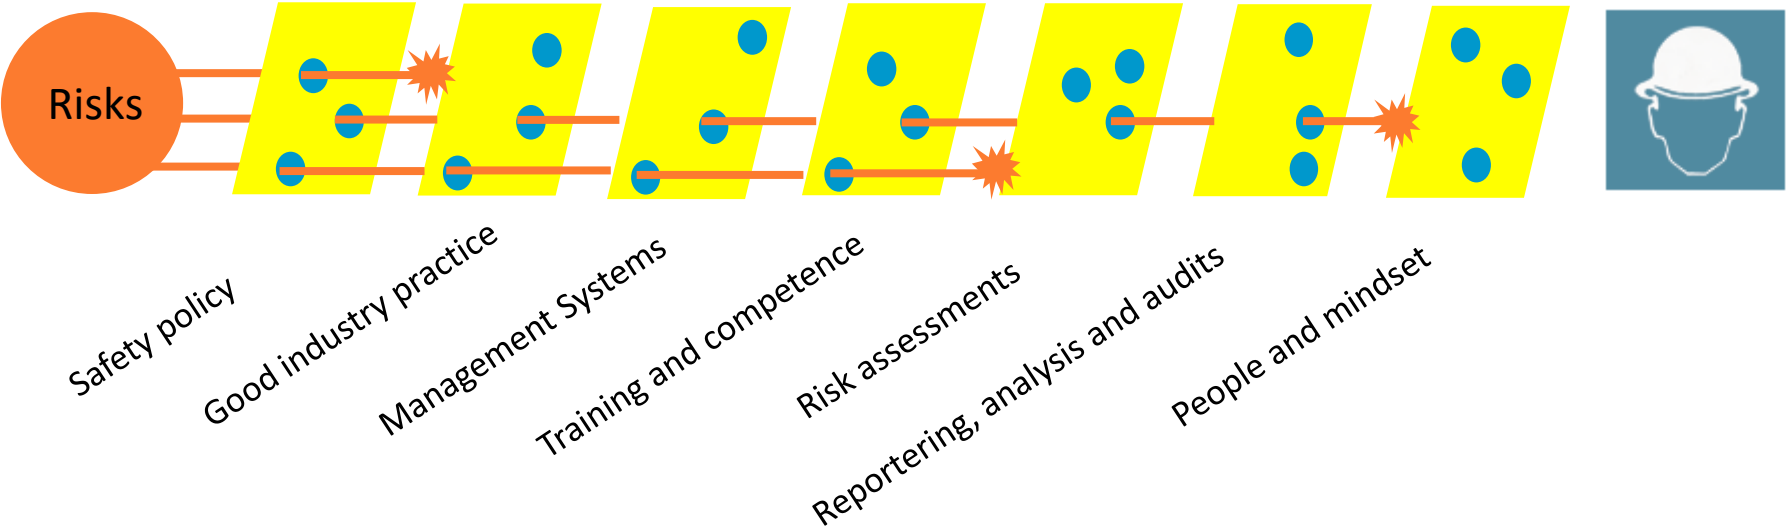

Managements Engagement

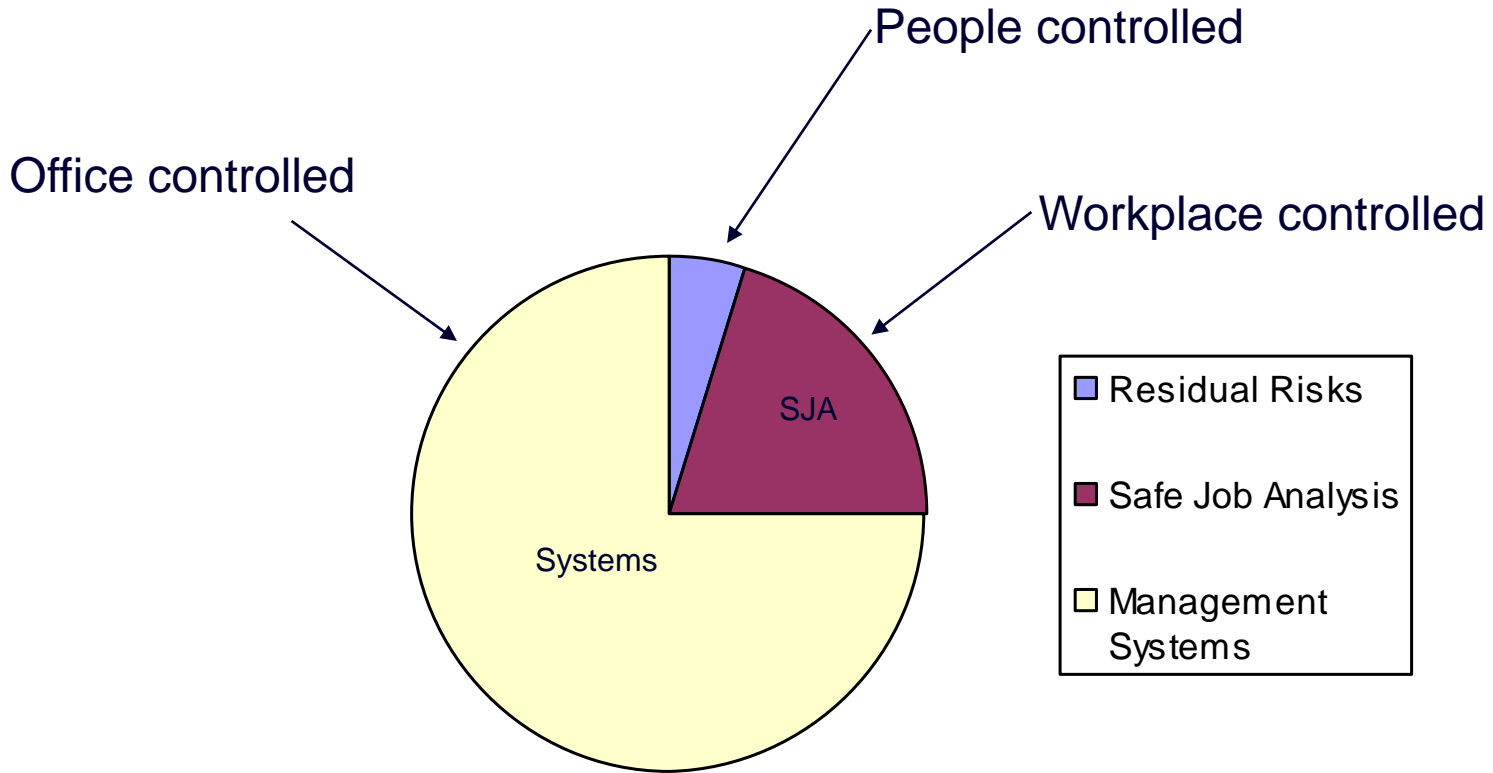

Safety Management

Barriers

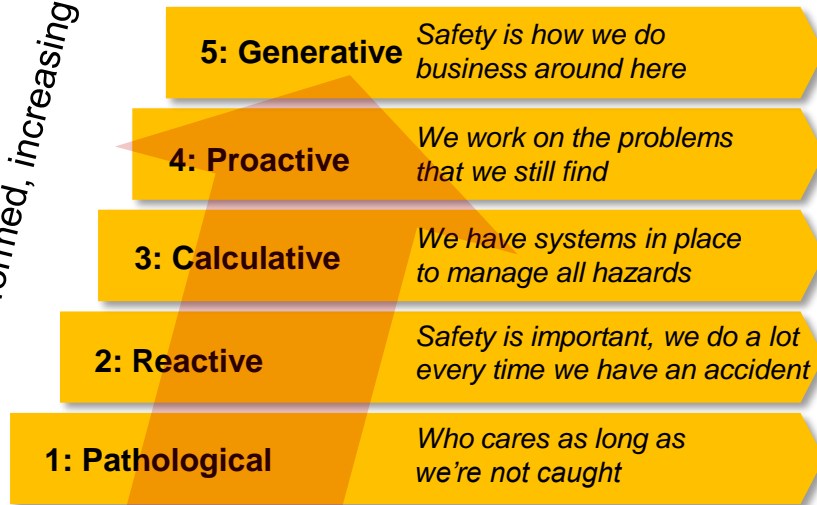

Safety Management

Risk Control

Safety culture maturity

Increasingly informed, increasing trust

Improving your Safety Culture

- Top management must be fully committed to safety
- The line managers must take responsibility for safety
- Qualified Safety Management support
- Understanding and manage the risks in your business
- Involve ALL individuals in the organisation

Building Safe Way Conduct

Evaluation

Workshop 2

- Who has the organizational responsibility for safety in a project and in the individual companies, and are there advantages and disadvantages to delegating responsibility?
- How can you measure the stage and maturity of the safety culture in a company?
- Which factors and conditions are important in order to develop and improve a safety culture in a company and which measures are necessary?
